

## **DEVICE MANAGER ADDED TO VOYAGE MANAGER ARSENAL**

**(Cambridge, 9 September 2011)** Voyage Manager has just added a new independent device tracking application to its already comprehensive list of features making it the most complete and all-encompassing Travel Management solution on the market.

In addition to the organisational, monetary, and safety benefits that Voyage Manager already provides, the new device tracking application has made the system even more automated and user friendly. Incorporating HLR Lookup, Device Manager can now automatically tell which country or region a phone is in; eliminating the need for the traveller's direct input.

Fully customisable, just like the rest of the Voyage Manager system, this new feature helps to increase the data available whilst minimising the individual's need for direct interaction with the system.
