

VOYAGE MANAGER SIGNS DEAL WITH THOMALEX

(Cambridge, 13 August 2010) Voyage Manager, one of the world's most effective travel monitoring and security tools has signed a deal with Thomalex, to provide Voyage Manager with access to the major GDSs.

Voyage Manager is currently developing a service which can automatically retrieve its clients' travel data through Thomalex. Once completed, the new service will greatly reduce the time users spend maintaining their travel details, helping to reduce costs as well as decrease the occurrence of errors during the data entry process.

Voyage Manager has already created a service enabling it to retrieve data from Triplt (the trip management company). With the Thomalex service Voyage Manager increases its reach significantly.

About Voyage Manager

Voyage Manager is an Internet based travel management and travel security service that provides businesses with a flexible, easy to use and cost efficient platform for managing and monitoring employee travel. Voyage Manager is accessible from any location by web, SMS and mobile phone.

Voyage Manager automatically monitors trips from the moment they are entered into the system until they have been completed, keeping travellers and relevant parties informed at every stage of a trip. Should a traveller not arrive at a destination, or the traveller sends an SOS to the system, security managers can be informed immediately and emergency procedures can be activated. The latter is becoming increasingly in focus as international business and operations are more frequently requiring people to travel to, from and through potentially hazardous areas.
