

VOYAGE MANAGER GOES SOCIAL WITH FACEBOOK

(Cambridge, 09 March 2012) Travellers can now have their Facebook profiles automatically updated with their latest Voyage Manager travel status updates.

Voyage Manager has made a significant step into the world of social media with the integration of the VM Travel Tracking Suite with the world's largest social network, Facebook. The Facebook integration allows travellers to automatically post their travel status updates on Facebook, allowing friends and family to easily follow the progress of their trips. Through automation the traveller does not have to perform any extra actions in order for their status to be published on Facebook, making the process effortless.

Voyage Manager recommends that clients using this feature do so with care as publishing data onto Facebook can compromise security. Clients can enable or disable the Facebook integration across the company, and each individual traveller can also choose whether or not to publish their data on the social network. For security reasons the Facebook integration is switched off by default, requiring the client to enable the feature.
