

VOYAGE MANAGER ANNOUNCES VM LIGHT

(Cambridge, 17 October 2012) Voyage manager Ltd, a technology company that specializes in travel security and tracking solutions, has recently announced the release of VM Light, a user friendly itinerary tracking service.

VM Light is a standalone itinerary tracker, designed for organizations that do not require the full functionality of the VM Suite, but are looking for a cost effective, simple travel tracker solution to increase employee security and efficient business travel.

VM Light is designed to compete with the itinerary trackers provided by the likes of iJet, ConTgo, Control Risks Group and International SOS, yet provide additional features and benefits.

VM Light imports itineraries from the major booking engines and Triplt, as well as supporting manual data entry. Throughout the lifecycle of a trip its status is automatically updated to reflect the current situation, making it easy to see who is scheduled to travel, who is at a destination and who is in transit. VM Light also supports any mode of travel, not just flights and train journeys, allowing increased flexibility and efficiency improvements.

With the addition of VM Light to the product suite Voyage Manager has solutions to cater for every client's needs, from the itinerary tracking level through to the most automated and advanced travel security and tracking in the market. VM Light is ideal for travel agencies as well as security and assistance companies that require a travel tracker to support their corporate offerings.

For more information on VM Light go to:
