

## **VOYAGE MANAGER INTEGRATES WITH SPOT**

**(Cambridge, 4 December 2012) Voyage Manager provides integration with the personal satellite messenger, SPOT.**

Voyage Manager Ltd has extended its range of tracking devices to include SPOT personal trackers. SPOT personal trackers are affordable GPS based tracking devices designed for use in inhospitable places. SPOT communicates using the Globalstar low earth orbit satellite constellation, ensuring near global coverage.

Voyage Manager integrates "VM Travel Tracker" with SPOT to automatically track travellers without any user interaction, making VM Travel Tracker the only completely automated travel tracking systems on the market.

This integration will further strengthen our leading VM Locate service. It allows the SPOT service to integrate with the device tracking we already offer through mobile phone, Iridium and GSM/GPS- based tracking of devices. It is all about offering our customers added value in safety and cost reductions through cutting edge technology." Christian Bunke, Business Development Manager

SPOT tracking devices incorporate emergency buttons which can be activated in the case of an emergency. When travellers activate the emergency services, Voyage Manager's emergency response is automatically activated, which includes notifying the traveller's emergency response contacts.
