

## **VOYAGE MANAGER INTEGRATES WITH WORLDMATE API**

**(Cambridge, 9 April 2013) Voyage manager, the leading provider of automated travel tracking and security solutions now provides integration with WorldMate Email Parsing API.**

Voyage Manager has integrated with WorldMate Email Parsing API, enabling travellers to easily and automatically import their travel itineraries into Voyage Manager. Travellers just need to forward their email itineraries to Voyage Manager's account, and within minutes the full itineraries are available in the travellers' Voyage Manager profiles. The integration with WorldMate API greatly reduces the time users spend maintaining their travel details and decreases the occurrence of errors during the data entry process.

Voyage Manager's products provide a solution that is more accurate and complete than any other product on the market.

For more information see <http://www.voyagemanager.com>.

### **About WorldMate API**

The WorldMate API is built upon the WorldMate platform, the world's largest mobile itinerary management and travel booking service, which has managed millions of itineraries over the years.

The WorldMate API processes travelers' confirmation emails, extracts all of the key information and sends it back to the developers, by doing so it is allowing developers to use the data to create a virtually limitless array of applications.
