

# Do you actually know where your people are right now?

Voyage Manager is the only fully automated global travel and security management system. Our service brings together real-time travel and location tracking, crisis management and evacuation support, as well as a sign of life system.

## **Flexible, easy-to-use, cost-effective**

We offer businesses a flexible, easy to use and cost-efficient platform for monitoring and managing all forms of employee travel. Our solution enables companies to fulfil their duty-of-care and HSE responsibilities by accurately locating staff anywhere in the world (including dangerous or remote locations) and raising the alert immediately if problems occur.

## **Automation and integration**

Voyage Manager's automation reduces the need for user interaction to ensure accurate and timely data, enabling you to act quickly in an emergency. It retrieves travel bookings from the major booking systems, and processes real-time travel information. It integrates with an unprecedented number of third party systems and an ever-growing range of tracking devices to provide industry-leading reliability and redundancy.

## What makes Voyage Manager different?

Conventional travel tracking solutions can only tell you where your employees are supposed to be. At Voyage Manager we know where they actually are. When travellers are on the move, Voyage Manager tracks their locations and movements, ensuring support staff know where their people are, be it at the right or wrong location. This is possible through the automation that is core to the Voyage Manager solution.

Voyage Manager's automation also reduces the administrative burden on travellers and support staff, saving them time while increasing compliance. This automation is supported by a vast amount of data that is collected and processed continuously.

Voyage Manager can easily tailor its solution to meet specific client needs, whether through bespoke development, or tailored reports, e.g. to ensure global tax compliance. Voyage Manager can be hosted and managed in-house by the client's IT department, or in the cloud by the Voyage Manager team.

## Key Features

- ✓ Automatically manages and monitors employee travel
- ✓ Works with any mode of travel, including commercial flights, ships, trains and cars
- ✓ Simplifies the management of groups
- ✓ Enables travellers to view their up-to-date travel details
