

As we approach the end of the year, we've been busy preparing for the holidays.

Our team has achieved some really ambitious goals this month, introducing newer platforms for our clients and we can't wait to bring you up to speed!

Mia Bazo enters it's soft launch phase

Mia Bazo - our new self service travel tracking platform designed for individuals, small groups, and companies - has entered it's soft launch phase. This new platform is a spin-off of the Voyage manager - which caters to larger organisations.

The Nucleus app is now available on the iOS App Store!

Until now, you've had to download different apps to access different parts of our services. Our new Voyage Nucleus and Mia Nucleus apps bring the vault, security, travel, tax, immigration, and expense services together into a single app.

Offer support to your temporary workers

The safety of your guest workers or temporary contractors falls under your purview, so make sure they're taken care of while they're with you. Now, our platforms allow organizations to track workers even if they aren't their full-time, permanent employees.

Check out our blogs to stay updated with all the latest developments in the travel industry with Voyage Manager

With the approval of the Pfizer-BioNtech covid-19 vaccine and the end of the Brexit transition phase, the British travelling industry is going to see a lot of rapid changes. Britons are going to have to alter their travelling habits once the international borders open up.
